Clean Water CHANGES LIVES

1 in 10 people live without access to clean water.

Women and children in Africa spend hours a day fetching dirty water which leads to illness and disease. Safe water gives people back their time, improves health, education and ends the cycle of poverty.

The Water Project provides safe and reliable water across sub-Saharan Africa. We develop and equip local partners to build water wells, sand dams, spring protections, and other water and sanitation solutions. Then we visit past water projects to make sure they are still working, providing communities with lasting, safe water.

Your support ends the water crisis and restores hope, one community at a time. For every gift, you receive stories, maps and photos about the community you helped and your specific water project. You know exactly how your giving makes a difference.

Lives change when communities gain access to clean water.
Experience it for yourself. Join us today.
